HOUSTON (September 9, 2010) – [Greene's Energy Group](#), a leading provider of integrated services for drilling, production, pipeline, construction and process operations, has announced the development of its new Commissioning and Nitrogen Services Division, announced Eric Langlinais, President.

This new division consists of project management; project development; engineering and design; construction management; instrumentation, electrical and mechanical support; preservation programs and execution; procurement; inspections; pipeline integrity management; decommissioning and abandonment; asset removal management; and nitrogen leak detection and purging services.

Greene's created this division to complement its existing services by enhancing the company's ability to remain with projects from the front end engineering design through the entire life of the facility or asset.

"It's our obligation to provide services that exceed our clients' expectations and provide them with the technology and services to complete their project efficiently," said Brandon Hillman, Division Manager. "The Commissioning and Nitrogen Services Division, along with our existing services, adds to this efficiency by enhancing our ability to partner with our clients through each step of the project's life cycle."

The division will be based in Houston, Texas, and Lafayette, La. and will provide services around the world.

Atlanta ■ Augusta, GA
Ft. Worth ■ Miami
New York City ■ Phoenix
Richmond, VA ■ Salt Lake City
San Francisco ■ Washington, D.C.
Winston-Salem, NC

Greene's Energy Group serves customers globally in [drilling](#), [production](#), [pipeline](#), [rig/platform construction](#) and process industries by offering tools and services to improve productivity and ensure safety, both onshore and offshore. Greene's employs 600 people worldwide with its group headquarters in Houston and operations headquarters in Lafayette, La.
