LAFAYETTE, La. (June 23, 2010) – [Greene's Energy Group](#), a leading provider of integrated services for drilling, production, pipeline, construction and process operations, has announced the development of its new Wastewater Treatment Division, which specializes in portable wastewater treatment equipment and services for the oil and gas pipeline industries.

Greene's Wastewater Treatment Division offers the industry's first truly modular linear flow bulk media (LFBM) filter system that provides superior performance with increased flow rates and loading capacities over traditional bulk bed and radial flow designs.

The LFBM canister design offers easier media change-out and the capability to utilize multiple media types in the same vessel that the stream dictates without blending them together as most traditional vessels require.

With this design, users can tailor the flow process with multiple configurations, depending on the project's requirements, to optimize media life and the actual amount of filter media needed for the specific process at hand without stopping flow.

"Our patent-pending technologies were specifically developed for the removal of hydrocarbons, solids, toxic materials and other contaminants generated from various streams, such as produced waters, hydrotesting, frac fluids and decommissioning operations, to name a few," said Elwin Faulk, General Manager of Greene's Wastewater Division. "This innovative technology allows us to provide quicker, more efficient and more versatile services than traditional wastewater technology."

Atlanta ■ Augusta, GA
Ft. Worth ■ Miami
New York City ■ Phoenix
Richmond, VA ■ Salt Lake City
San Francisco ■ Washington, D.C.
Winston-Salem, NC

This division is based in the company's Lafayette, La., office with operations reaching throughout North America and offshore Gulf of Mexico.

Greene's Energy Group serves customers globally in [drilling](#), [production](#), [pipeline](#), [rig/platform construction](#) and process industries by offering tools and services to improve productivity and ensure safety, both onshore and offshore. Greene's employs 600 people worldwide with its group headquarters in Houston and operations headquarters in Lafayette, La.
