

# SAFE ENOUGH?

**YES NO**

Is your safety culture as good as your written safety program?

Do your contractors share safety data with each other?

Are your employees and contractors encouraged to stop the job when they notice a safety issue?

Do you have daily access to the safety reports produced by every contractor on your worksite?

Are contractors crossing company boundaries in their commitment to behavior-based safety?

Do your HSE reps act like safety coaches instead of safety cops?

**Greene's**  
Energy Group™

# IF YOU ANSWERED ANY QUESTION “NO,” YOU OWE IT TO YOURSELF TO FIND OUT MORE ABOUT THE BEHAVIOR-BASED SAFETY-MANAGEMENT SYSTEM FROM GREENE’S ENERGY GROUP.

## BETTER THAN A THIRD-PARTY SAFETY SYSTEM

Greene’s Energy Group has been working efficiently at your worksite, and others like it, for more than 50 years. During these five-plus decades we have built an extraordinary safety record because we fully understand the work environment and its many challenges.

Now we are packaging our safety system procedures into a value-added service on our multi-service projects such as oil and gas platform construction, pipeline pre-commissioning, and offshore microbial treatment. It’s one more way we work with “safety first and foremost”—our motto for more than five years.

## WHAT WE DO

### Location Services and Training Programs

- On-site consultation
- Risk assessment
- BBSP development, implementation and analysis
- JSA development
- Safety meetings
- Compliance audits
- Job site audits
- On-site HSE training

### Reports and Custom Forms

- JSA’s
- BBSP cards
- Safety meeting
- Job site audit
- Facility audit
- Inventory
- Equipment maintenance

## THE KEY IS SHARED SAFETY DATA

Greene’s uses the E-Tracker 5 system to compile safety data from every contractor on your worksite. This enables us to pinpoint safety concerns much earlier—and take immediate steps to prevent injuries.

Data compiled from multiple contractors produces more accurate and valuable safety information, benefiting every contractor on site and especially you the facility or asset operator.

## SAFETY DATA THAT WORKS FOR YOU

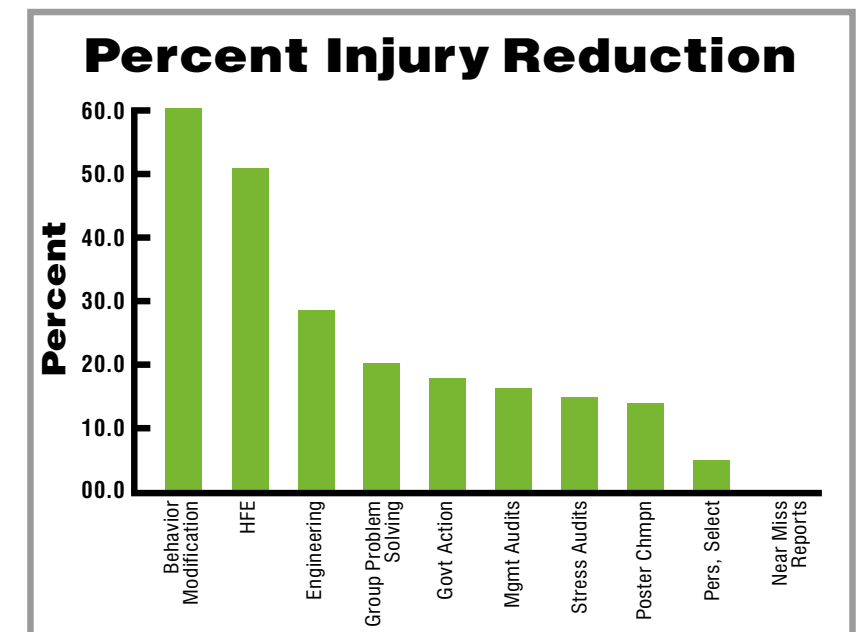

Greene’s not only greatly enhances your safety system, but also can track your HSE data, delivering it to you in the format that works best for you.

## ALL CONTRACTORS WORK AS A SINGLE TEAM

Greene’s safety-management system ensures that every contractor on your worksite operates as a willing member of a single, well-oiled team. With Greene’s system in place, each person watches out for the others on site and works toward a common goal: for everyone to return home safe and uninjured.

## BEHAVIOR-BASED DATA THAT ENSURES SUCCESS

Behavior-based programs have proved, again and again, to dramatically improve workplace safety. In fact, a 1993 survey (shown right) indicated a 60 percent injury reduction with behavior modification. Greene’s addition of the E-Tracker system to a tried-and-true behavior-based program is the key to its success.

## SEE THE RESULTS FOR YOURSELF

Your Greene's representative can show you how our behavior-based system, with its wealth of data, can bring your safety program to world-class levels.

## ANYTIME. ANYPLACE.

Founded in 1953 as a blowout-preventer testing company, Greene's has earned respect for its experience, responsiveness and close attention to safety.

Today Greene's capabilities include critical support for customers engaged in drilling, production, pipeline, rig/platform construction and process industries. The company offers tools and services to improve productivity and ensure safety, both onshore and offshore.
