

Cherokee Pumping Services & Rentals

Greene's
Energy Group™

Having a wide range of the latest tools and technology, Greene's Pumping Services & Rentals is your single-source solutions provider. We service and supply the worldwide oil and gas industry with the highest quality inventory of specialized rental equipment designed to enhance your completion and production operations both quickly and cost-effectively.

The right equipment, whenever and wherever you need it. Whether it's a coiled tubing and snubbing job, a Tubing Conveyed Perforating (TCP) procedure in one of the shale plays, well testing or flowback operations in west Texas, plugging and abandonment of an offshore well, or simply purging a pipeline or well with nitrogen, the Pumping Services and Rental PSL of Greene's Energy Group has the equipment, personnel, and knowledge to deliver solutions wherever you need them.

Cherokee Pumping Services & Rentals

Cherokee Pumping Services leads the industry with the latest technology, highest quality pumping products and most experienced and competent personnel.

Our pumping applications include:

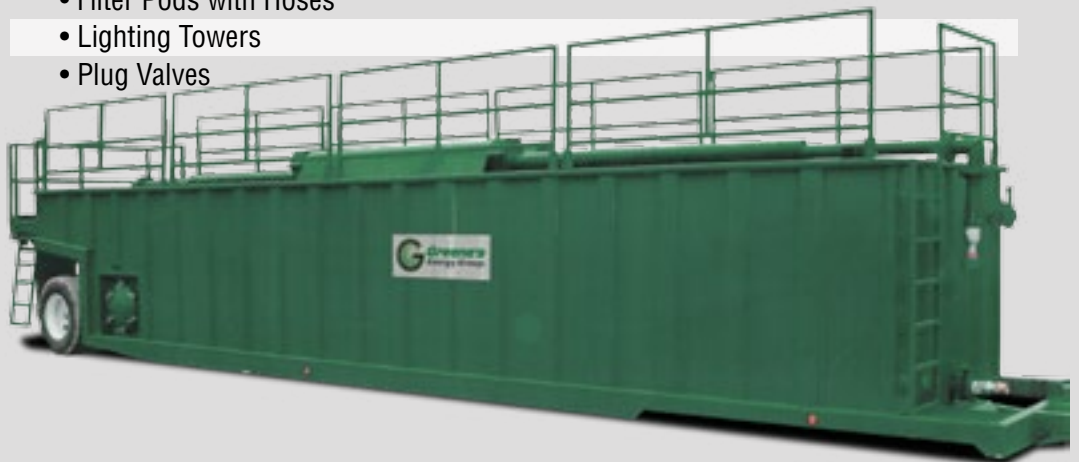

- Coiled Tubing Support
- Snubbing Support
- Plug Milling Support with Coiled Tubing
- P&A Support Services
- Hydrotesting Services
- Miscellaneous Well Support Services
- Miscellaneous Pressure Pumping Services

Coiled Tubing and Snubbing Packages

Greene's Pumping Services & Rentals can deliver all of your required equipment and ancillary supplies for coiled tubing and snubbing jobs directly to the jobsite. All of our equipment arrives with approved engineering drawings, and is inspected, tested and certified to the highest standards before going out to the field.

Partial Equipment Line:

- BOPs
- Quads, Dual Combos, Single, and Blind Shear
- Tri-Plex Pumps
- TEE, TEE Extreme, OPI 600 0–15mwp
- Tanks with Gas Busters
- Dual Choke Manifolds
- Adapter Spools
- 15bbl Cement Mixing Tanks
- 4"x 4" and 3" x 3" Centrifugal Pumps
- Flowback and Pump Iron
- Air Compressors
- Filter Pods with Hoses
- Lighting Towers
- Plug Valves

Flexible Steel Pipe for Challenging Environments

When the working situation becomes rough and challenging, we offer many different hose options. Our flexible steel pipe comes in a variety of sizes and arrives in a single-lift basket which allows for ease of off-loading and storage. As with all of our equipment, our flex pipe is inspected, tested and certified to the highest standards, and can include the following options:

- 2" 10M
- 3" 10M
- 4" 10M
- Transport Baskets

TCP Packages

Because of the increase in drilling horizontal wells, Greene's now carries a hefty inventory of Tubing Conveyed Perforating (TCP) equipment designed to offer customers the necessary tools to reach the perforating depths. Some of the equipment in our inventory includes:

- Flow Heads
- Dual Choke Manifold
- Chicksan Loops
- Plug Valves
- Tees
- Gauges with Data Header
- Pup Joints
- Slips and Bowls
- Safety Clamps

Flowback Support Equipment

Following a well treatment, it is imperative that the well be returned to production in an environmentally safe condition, with all fluids having been cleaned from the operation. We deliver a variety of provisions for flowing back fluids, and support options to help ensure a safe cleanup and return of the well to production. A sampling of our flowback support equipment includes:

- 2" - 4" Flow Iron
- 2" - 4" H₂S Iron
- Up to 300bbl Open Tank with Gas Buster (featuring the small footprint 100bbl)
- Dual-Choke Gate Valve Manifolds
- Sand Traps

You Require. We Respond.

Plug & Abandonment Pumping Tools

With strict governmental and environmental regulations regarding plugging and abandonment, the right equipment is paramount. We give our customers the choice of an assortment of various P&A support equipment options, all of which are designed to make sure the well is properly prepared for permanent and safe abandonment. Our P&A/Pumping packages can contain:

- 4" x 4" Centrifugal Pumps with Hydraulics
- Cement Mixing Tanks
- Chicksan Iron
- Tri-Plex Pumps

The Highest Quality Well Testing Components

In virtually any type of well, whether it be high pressure, low pressure, horizontal, or directional, Greene's will provide all of the equipment needed to safely and effectively execute well testing operations. Our equipment packages can include:

- 2" Flow Iron
- 3" Flow Iron
- 4" Flow Iron
- Dual Choke Gate Valve Manifolds
- Manumatic Gate Valves

Pipeline Support Packages

Our pipeline support equipment is designed and maintained to safeguard pipeline integrity, which in turn will give you the confidence that your oil and gas transport system is safe and efficient. Our pipeline support packages include the following equipment:

- 2" – 10" Low Pressure Piping
- 2" – 10" High Pressure Piping
- 90s and Swings
- Tees and Crosses
- Valves
- Swivel Flanges
- Tri-Plex Pumps
- New – 900 HP Pump with 4-1/2" and 6" Plungers

Nitrogen Support Packages

Because production and handling of hydrocarbons usually require the use of chemically inert nitrogen, we have a broad range of nitrogen support equipment immediately available to assist you in enhancing production by kick-starting the flow of fluids from the well. Our objective is to provide safe, efficient, and economical solutions to your precise problems, and those solutions can come in the following equipment packages, all of which are inspected, tested and certified:

- 1" High Pressure Hoses
- 1" Chicksan Iron
- 1" Valves
- 2" Valves
- 1" 90s and Swings
- 2" 90s and Swings
- Hose Restraints

Focus on Safety

At Greene's, safety is our first priority. Experience, knowledge, responsiveness and attention to safety have made Greene's Energy Group an industry leader. This mission guides the company's growth and expansion plans for all of its energy service businesses. Protecting the health and safety of our people and the public, preserving the environment and preventing damage to property are paramount.
