A leading provider of integrated testing, rentals and specialty services, Greene’s Energy Group offers tools and services to improve productivity onshore and offshore while emphasizing zero safety incidents, operational excellence, responsiveness and reliability.

Abandonment & Decommissioning Services Locations:
- Broussard, LA - 337-232-1830
- Lafayette, LA - 337-232-2911
- Maurice, LA - 337-422-6590

Focus on Safety
At Greene’s, safety is our first priority. Experience, knowledge, responsiveness and attention to safety have made Greene’s Energy Group an industry leader. This mission guides the company’s growth and expansion plans for all of its energy service businesses. Protecting the health and safety of our people and the public, preserving the environment and preventing damage to property are paramount.
**Abandonment & Decommissioning Support Services**

Whether decommissioning a pipeline or platform or well abandonment, Greene's Energy Group provides essential abandonment and decommissioning support services to the oil & gas industry. As an integrated services provider, Greene's offers multiple abandonment and decommissioning support services from a single provider with decades of experience.

### Well Abandonment Support

When production from a well ceases or is no longer profitable, the options are to permanently plug and abandon (P&A) the well and remove the wellhead or to re-use the slot by plugging the original well and sidetracking a new wellbore.

Whether P&A or slot recovery, Greene's has the equipment and expertise to assist with disassembly of wellhead equipment, casing cutting and handling and mud/cement pumping to support your operations. Greene's services include:

<table>
<thead>
<tr>
<th>Services &amp; Equipment</th>
</tr>
</thead>
<tbody>
<tr>
<td>• High volume pumps, hoses, flow iron, manifolds, mixing tanks to prepare/move mud and cement</td>
</tr>
<tr>
<td>• Pumps for hydrostatic pressure testing</td>
</tr>
<tr>
<td>• Hydraulic torque wrenches for nippling down/decommissioning trees, flanges and stacks</td>
</tr>
<tr>
<td>• Casing saws to cut through multiple strings of casing (cross section)</td>
</tr>
<tr>
<td>• Boring saws to bore holes through casing for installing pins</td>
</tr>
<tr>
<td>• Heavy slings and pins for casing handling</td>
</tr>
<tr>
<td>• Casing jacks</td>
</tr>
<tr>
<td>• Wellhead service personnel to decommission wellheads (set BPVs and rig down tree)</td>
</tr>
</tbody>
</table>

### Pipeline Abandonment Support

Decommissioning of pipelines can include disassembly, flushing, cleaning and product recovery. Greene’s has an industry leading fleet of pumps and flow iron for all volume and pressure requirements. In addition, Greene’s can provide three-phase separators to properly recover and separate any product and water treatment systems to treat water so it can be safely discharged overboard. Greene’s services include:

<table>
<thead>
<tr>
<th>Services &amp; Equipment</th>
</tr>
</thead>
<tbody>
<tr>
<td>• High volume pumps, hoses, flow iron, manifolds for flushing pipelines</td>
</tr>
<tr>
<td>• Three-phase separators, water treatment/ filtration to handle discharge from flushing</td>
</tr>
<tr>
<td>• Hydraulic torque wrenches for breaking flanges and risers</td>
</tr>
<tr>
<td>• Pigs for cleaning pipelines</td>
</tr>
<tr>
<td>• Nitrogen services</td>
</tr>
</tbody>
</table>

### Platform Abandonment Support

Older, non-producing platforms are required by regulatory bodies — now more than ever — to be completely removed. When a platform is abandoned, the platforms, including the topsides, templates and pilings must be cut and removed to below the mudline and transported inland. Prior to topside removal all associated piping, vessels and hoses require flushing and cleaning. Greene’s services include:

<table>
<thead>
<tr>
<th>Services &amp; Equipment</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Cleaning/flushing flow lines and production piping</td>
</tr>
<tr>
<td>• High volume pumps, hoses, flow iron, manifolds</td>
</tr>
<tr>
<td>• Hydraulic torque wrenches, hot bolting for breaking flanges on production piping and flow lines</td>
</tr>
<tr>
<td>• Bull-heading fluid from flow lines into wells</td>
</tr>
<tr>
<td>• Three-phase separators, water treatment/filtration to handle discharge from flushing</td>
</tr>
<tr>
<td>• Recondition trees and valves for client re-use on other platforms or resale</td>
</tr>
</tbody>
</table>
Abandonment & Decommissioning Support Services

When a well’s productive life is over, regulations dictate that it be plugged and abandoned and the platform be decommissioned. This process of abandonment and decommissioning has amplified the need for specialists who can complete the job safely, efficiently, and cost-effectively with a combination of the right people and the right tools. Greene’s Energy Group has been the company of choice for decades.

Well Abandonment Support

When production from a well ceases or is no longer profitable, the options are to permanently plug and abandon (P&A) the well and remove the wellhead or to re-use the slot by plugging the original well and sidetracking a new wellbore.

Whether P&A or slot recovery, Greene’s has the equipment and expertise to assist with disassembly of wellhead equipment, casing cutting and handling and mud/cement pumping to support your operations. Greene’s services include:
