

Well Testing – Jumbo 620

Jumbo 620 Specifications:

- Diameter 6'
- Length 20'
- Pressure Rating 1,440 psi MAWP
- Weight 25,000 lbs
- Pressure Tested to 2,150 psi
- Trailer Mounted Unit
- ASME Coded

Jumbo 620 Operating Features:

1. 3 Chamber/Weir Vessel
 - Solids drop off and gas separates in first chamber, water in the second and oil separated and measured off third chamber
 - Vessel built with perforated diverter plate to help with defoaming & turbulent flow
 - Each chamber has a separate outlet for purging
2. Large Diameter & Overall Length
 - Largest 1440 rated 4 Phase Separator available in the market
 - High pressure rating makes it more flexible as wells have shorter choke opening schedules
 - Preferred on tankless locations requiring higher pressure outputs for gas
 - Can handle the largest flow volumes of gas, water and oil
3. External Features
 - Inlet & outlet connections all made from the back of the trailer.
 - Ability to easily comingle product, send individual phases or any combination that the customer requires
4. Measurement & Control features
 - Able to sample fluid during the well flow
 - Utilizes 2 different types of gas meters (EFM and Barton) to check gas rates & pressure ratings
 - Unit laminates flow along meter run with straightening veins prior to flow rate calculation.
 - Independent line to revert PSV discharge to flare or atmosphere
 - Setup with 2 ESD systems
 - 1 hi/lo pressure switch
 - 1 liquid overflow switch

You Require. We Respond.

Greene's Energy Group, a completions and production-focused business servicing exploration and production companies, is ready to help with your next project in the Permian Basin, South Texas and other serviceable locations.

Greene's Energy Group values experience, knowledge, responsiveness and attention to safety as the keys to being a successful oil and gas service company.
