Well Testing

Greene's
Energy Group™

The right equipment, the right personnel, the right solutions whenever and wherever you need it. Greene's Energy Group offers well testing, hydraulic choke and laboratory services for evaluating a well and then prepares it for production by monitoring the well flowback, electronically measuring the gas and fluid pressures, analyzing samples, and delivers precise reports to our customers to warrant the best results. And these reports can be viewed securely by our customers anywhere in the world, at any time.

When you are planning the implementation of a well test to understand the characteristics of the reservoir, you need the well in the best possible condition so data readings are accurate. Greene's well testing delivers solutions from short-term flow back to permanent production. We'll remove destructive drilling fluids and completion fluids before you assign the well to permanent production. As one of the largest well testing companies in the US, Greene's Energy Group has the equipment, the personnel, and the knowledge to deliver solutions whenever and wherever you need them.

Well Testing

Greene's offers the winning combination of decades of knowledge gained in the field and technologically advanced equipment to deliver a complete line of well testing, flowback and production solutions to our customers.

Our professionals will meet with you in advance to custom design the correct package of equipment and services needed to meet your particular requirements and successfully execute the project. Whether it's performing toe-prep, frac support, the drill-out of plugs, flowback, well control operations or production support, you can count on Greene's to be there with the right people and the right equipment.

Our expert well testing *services* include:

- Electronic Gas Measurements
- Electronic Fluid Measurements
- API Gravity Monitoring
- Chloride Readings
- Real-time Reporting
- Low Emission Capabilities

Some of our well testing *equipment* includes:

- Flowback Manifolds
- Three-phase, High Volume Separators [High/low and Liquid Level Shut Downs]
- Sand Separators
- Line Heaters
- ESD Valves
- Flow Tanks
- Flare Stacks
- Generators, Light Towers
- Piping

Hydraulic Choke Services

Greene's Hydraulic Choke Services combines engineering and application expertise to design, develop and produce equipment that withstands the most arduous applications and harsh locations. Our Choke Service applications include snubbing, coiled tubing drill-out, frac support and extreme flowback.

Greene's array of Hydraulic Choke equipment includes:

- Hydraulic Chokes [2-1/16" 15,000 WP Dual Choke Manifolds]
- 3" 15,000 WP Plug Parts Catchers
- Hydraulic Control Trailers
- Hydraulic Service Trailers
- Flowline Packages

Never Out of Touch with Your Data, View Your Well Files Any Time

Greene's has established an online document portal which provides our clients secure online access to their well documents anytime, anywhere.

Additionally, our field technicians utilize laptops with secure network cards in remote areas to make real-time updates to well data on the customer's document portal.

Greene's Laboratory Services

Greene's laboratory services include gas chromatograph analysis (through C11+), hydrocarbon liquids analysis (through C31+), and brine water analysis via ICP and ASTM D-86 distillation of stock tank HC liquids. In addition, we provide field sampling services by highly trained lab personnel.

Greene's professional technicians use the most advanced gas chromatography analysis tools, and can quickly analyze and turn around samples. The average turnaround time for sample analysis is 48 hours, but Greene's also offers same day lab analysis when needed.

Some of the laboratory services offered by Greene's include:

- Hydrocarbon Analysis
- Condensate/oil Analysis
- Water Analysis
- On-site Sampling

Greene's Well Testing

1. Headquarters: Alice, TX
2. Laredo, TX
3. Odessa, TX
4. Pleasanton, TX
5. Imperial, PA

Focus on Safety

At Greene's, safety is our first priority. Experience, knowledge, responsiveness and attention to safety have made Greene's Energy Group an industry leader. This mission guides the company's growth and expansion plans for all of its energy service businesses. Protecting the health and safety of our people and the public, preserving the environment and preventing damage to property are paramount.

You Require. We Respond.

A leading provider of integrated testing, rentals and specialty services, Greene's Energy Group offers tools and services to improve productivity onshore and offshore.
